KEY JUDGMENTS

KJ-1 IRAN/HORMUZ: Iran will not sign a formal MOU this week without Lebanon ceasefire enforcement as a precondition. Mediation suspension announced by Iranian state media reflects deliberate leverage; Trump/Rubio dispute creates ambiguity. Active kinetics 02-03-JUN (Kuwait airport) signal Iran is escalating pressure while negotiating.

LIKELIHOOD: Likely. **CONFIDENCE:** MODERATE.

CHANGE FROM PRIOR: Prior cycle assessed talks as tentative but progressing. This cycle: mediator comms suspended, Kuwait airport hit, Lebanon blocking condition hardened. Assessment moves from cautious progress to probable stall.

KJ-2 RUSSIA/UKRAINE: Russia will continue mass aerial campaigns against Ukrainian civilian and energy infrastructure through the summer. The US June peace deadline has no enforcement mechanism; Zelensky will not accept terms without security guarantees. Talks remain stalled at February 2026 Geneva baseline.

LIKELIHOOD: Very likely. **CONFIDENCE:** HIGH.

KJ-3 EBOLA: Ebola outbreak will remain contained to DRC and Uganda for the next 30 days. Brazil clearance reduces out-of-continent spread risk. The revised case count (down from ~1,000 suspected to 344 confirmed) reflects [WHO/ECDC](#) reclassification, not outbreak contraction. MSF assessment that response has not caught up to the epidemic is the primary concern.

LIKELIHOOD: Likely. **CONFIDENCE:** MODERATE.

ANALYTICAL STANDARDS & SOURCE REGISTRY

This report is produced under the [FFTP Analytical Standards](#) (ICD 203/206 compliant) using the [FFTP Master Source Registry](#). All sources are tiered by reliability and assigned confidence levels. Likelihood language follows the §0.55 estimative ladder.

| REGISTRY | TOTAL SOURCES | TIER 1 | TIER 2 | TIER 3 |
|------------------------------|---------------|--------|--------|----------------------|
| Master Source Registry v2.21 | 629 | 367 | 253 | 9 (use with caution) |

ANALYTICAL STANDARDS

FFTP Intelligence Operations Division follows ICD 203 (Analytic Standards) and ICD 206 (Sourcing) for all scored entries. Every FLASH and HIGH entry carries: (1) likelihood band from the §0.55 estimative ladder, (2) confidence level (HIGH/MODERATE/LOW), and (3) minimum two alternative hypotheses with supporting and disconfirming evidence.

TIER DEFINITIONS

T1: Primary government, academic, or institutional sources with direct reporting capability. **T2:** Established news organizations with editorial standards and regional expertise. **T3:** Specialized or emerging sources used with explicit framing caveats.
