### KEY JUDGMENTS

**KJ-1 IRAN/HORMUZ:** Lebanon CF Day 5 - zero compliance. Hezbollah rejection gives Iran a new stated pretext for blocking MOU talks. Iran navy warning shots at US warships 05-JUN are the most significant new kinetics this cycle. Brent \$95.25 on tentative MOU signals; Lebanon track is the primary upside risk. No MOU signing expected this cycle.

**LIKELIHOOD:** likely. **CONFIDENCE:** MODERATE.

**CHANGE FROM PRIOR:** Prior cycle assessed talks as tentative but progressing. This cycle: mediator comms suspended, Kuwait airport hit, Lebanon blocking condition hardened. Assessment moves from cautious progress to probable stall.

**KJ-2 RUSSIA/UKRAINE:** Russia will continue mass aerial campaigns against Ukrainian civilian and energy infrastructure through the summer. The US June peace deadline has no enforcement mechanism; Zelensky will not accept terms without security guarantees. Talks remain stalled at February 2026 Geneva baseline.

**LIKELIHOOD:** very likely. **CONFIDENCE:** HIGH.

**KJ-3 EBOLA:** Trajectory: ACCELERATING. 363 confirmed / 62 deaths DRC. ADF and M23/AFC armed groups in Ituri/N.Kivu are the primary analytical driver - security conditions limit aid movement and facility access. [WHO](#) revised suspected count 906-116; confirmed is the operative number. No approved Bundibugyo vaccine. Out-of-region case probability rising.

**LIKELIHOOD:** likely. **CONFIDENCE:** MODERATE.

**CHANGE FROM PRIOR:** PRIOR: 344 confirmed / 48 deaths, trajectory ACCELERATING. CURRENT: 363 confirmed / 62 deaths (+19 new). ADF/M23 armed conflict identified as primary driver of response failure. Trajectory unchanged: sustained ACCELERATING.

If Iran-US talks collapse: spike toward \$100+. Alt-Hyp 1 (unlikely): Hezbollah accepts modified CF terms within 72 hours, opening Iran MOU track. Disconfirming: Qassem statement 04-JUN was categorical rejection. Alt-Hyp 2 (roughly even chance): Iran navy incident escalates, US responds kinetically, Brent spikes toward \$100.
