KEY JUDGMENTS

KJ-1 US-IRAN MOU (Op Epic Fury Day 119 / MOU Day 10):

MOU signed 17-JUN-2026. Lebanon 5th-round talks concluded 25-JUN without framework agreement -- Leiter declared talks a train wreck over MOU-Hezbollah linkage. Nabatieh strike 25-JUN (2 killed) -- first IDF action since ceasefire; deconfliction cell operational. IAEA Blackout Day 119: Grossi (24-JUN Fukushima) holds MOU text mandates IAEA supervision; Iran Deputy FM Gharibabadi denied -- access conditioned on final deal + sanctions removal. Vessel struck off Oman coast 25-JUN (unattributed). Brent \$74.43/bbl. Iran chief negotiator: Hormuz "will be administered by Iran." Burgenstock nuclear WG resumes next week.

LIKELIHOOD: ROUGHLY EVEN CHANCE (verifiable IAEA framework established within 60-day window; Burgenstock nuclear WG is the primary watch point). **CONFIDENCE:** MODERATE.

CHANGE FROM PRIOR (Day 119): Lebanon 5th-round concluded without agreement -- Leiter "train wreck" declaration. Nabatieh strike 25-JUN. Gharibabadi explicit IAEA denial. Brent -\$1.11.

KJ-2 IAEA VERIFICATION BLACKOUT (Day 119):

440.9 kg 60%-HEU -- last IAEA-verified 28-FEB-2026; unverified Day 119. 60-day MOU window expires ~17-AUG. Grossi (24-JUN): MOU text requires IAEA supervision -- "This is going to happen." Iran FM Gharibabadi (25-JUN): denied access; conditioned on final deal and sanctions removal. US-Iran dispute characterized as "war of words" -- MOU text governs. ISIS: 60%-HEU sufficient for multiple devices; weaponization capability severely degraded; breakout timeline 1+ year from zero.

LIKELIHOOD: ALMOST CERTAIN (Iran maintaining functional enrichment with no IAEA visibility). **CONFIDENCE:** HIGH.

CHANGE FROM PRIOR (Day 119): Gharibabadi explicit denial of IAEA access. Grossi counter-statement holds MOU text governs. Iran silent at cycle close. 60-day window running.

KJ-3 EBOLA PHEIC TRAJECTORY (Day 42):

DRC: 1,118 confirmed / 291 deaths / 408 hospitalized (24-JUN MoH). France: first EU/EEA confirmed case 24-JUN. WHO Lancet model (25-JUN): South Sudan 69.3% probability case within 12 weeks. Contact tracing ~45% (WHO requires 90%). No approved vaccine or treatment for Bundibugyo strain. 150+ patient escapes from facilities since late May. CDC MMWR: without intensified containment, 10,000-20,000 cases possible in 3 months. WHO sitrep expected ~29-JUN.

LIKELIHOOD: LIKELY (PHEIC footprint expansion to additional countries within 30 days given contact tracing failure rate). **CONFIDENCE: MODERATE.**

CHANGE FROM PRIOR: France EU import confirmed 24-JUN -- first EU/EEA case. South Sudan Lancet model published 25-JUN. +24 new cases +14 deaths since 22-JUN.
