

DAILY PREPAREDNESS BRIEF

Household Edition -- Friday, 17 July 2026
fortunefavorstheprepared.com

⚠ PREPAREDNESS CONDITION 3 -- BROWN SKY -- INCIDENT PROBABLE ⚠

Friday, 17 July 2026 | PREP-CON 3 BROWN SKY | WX-CON 3 GUARDED (down from 4) | SWX-CON 2 WATCH (confirmed stable) | COMCON 4 INCREASED VIGILANCE | NIFC NPL 4 of 5 (last confirmed 12-JUL) | Venezuela EQ Day 24 -- 4,829 dead | Ebola PHEIC Day 63 -- DRC 2,011 confirmed (754 deaths)

THE ONE THING TODAY

US-IRAN WAR ESCALATES: SIX STRAIGHT NIGHTS OF STRIKES, PEACE TALKS FRAMEWORK NOW VOID

Iran has declared the negotiating framework with the US void, saying it now has "complete freedom of action." The US military has struck Iran for six nights in a row (through last night), and for the first time is striking during daylight and hitting targets further inland -- a sign the US believes Iran's coastal defenses are no longer much of a threat. A strike on a bridge in southern Iran killed at least 7 people. Iran continues firing on Gulf allies -- Kuwait says a drone attack caused serious damage this week, and Qatar shot down an incoming projectile today. There's no direct safety action for US households, but gas prices may keep moving -- the national average moved to \$3.89/gallon this morning, up slightly overnight. Separately, the Babylon Fire (UT) remains the nation's largest wildfire at just over 107,000 acres and is now 57% contained, up from 50% two days ago -- continued good progress, though evacuation status can still change quickly.

If you're near either Utah wildfire, know your evacuation zone status today -- don't assume yesterday's status still applies, even with containment improving.

WHAT TO WATCH -- THIS 24 HOURS

VENEZUELA EARTHQUAKE -- Day 21 Recovery/Reconstruction

Day 21: the confirmed toll has risen further to 4,829 dead, up from 4,490 -- backlogged recovery/identification work, not a new event. The injured count (16,740) hasn't been updated by Venezuelan officials in over a week now, which is itself a concerning sign about the pace of their own reporting. Phone and internet remain disrupted in some areas -- use Signal/WhatsApp/Zello if available, or satellite. Red Cross Disaster Welfare Inquiry: redcross.org. Do not travel to Venezuela.

WILDFIRE -- BABYLON FIRE 50% CONTAINED, NEW COMMAND TEAM TAKES OVER

See today's lead story above -- Babylon Fire (UT) remains the nation's largest at roughly 106,300-106,600 acres, now 50% contained (up from 47%), and a new firefighting command team took over early this morning. Cottonwood (UT) is holding at 97,458 acres/77% contained -- confirmed fresh this cycle via InciWeb. Evacuation status is improving but can still change quickly -- if you're in an affected area, don't wait for a further order if conditions worsen. If you're anywhere in fire country this summer, know your evacuation route before you need it.

SEVERE WEATHER -- MARGINAL RISK SOUTHEAST/MONTANA TODAY, ENHANCED RISK NEW ENGLAND TOMORROW

The Storm Prediction Center has a Marginal risk out today for the Southeast (Florida into eastern Georgia/South Carolina) and Montana -- mainly isolated damaging wind gusts, nothing widespread. Tomorrow is a bigger concern: an Enhanced risk is forecast for northern New England, with strong-to-severe storms and a real tornado threat, including the possibility of a strong tornado, as a sharp weather system moves through. If you're in New England, keep an eye on the forecast tonight and tomorrow and know where you'd shelter.

EBOLA PHEIC -- DAY 59 / US CASE MOVED TO GERMANY FOR TREATMENT

DRC now has 1,963 confirmed cases (719 deaths) -- the fatality rate is holding around 36%, and case counts jumped noticeably since the last update. New this cycle: we now know where the American aid worker who tested positive is being treated -- a hospital in Frankfurt, Germany, not the US. That's good news for anyone worried about domestic spread; it was never a US-based exposure risk. The Bundibugyo strain still has no approved vaccine or treatment. US risk for the general public remains very low. No action required for most US households. If you recently returned from DRC or Uganda and develop fever, muscle pain, or bleeding, contact a doctor immediately and mention your travel.

CYBER -- NEW CRITICAL VULNERABILITY / HOME NETWORK CHECK

For home users: SimpleHelp and Microsoft SharePoint Server are now overdue for a fourth cycle in a row, with confirmed ransomware and infostealer exploitation already underway. The two smaller tools added last week -- iCagenda and Balboa Forms, both used on some websites -- are now overdue too. We checked for new critical vulnerabilities this cycle and found another one -- affecting SonicWall and Microsoft ADFS products this time. If you or your employer use any of the tools above, patch now. No mass-exploitation events targeting individual home users were reported this cycle.

WORLD CUP -- SEMIFINALS THIS WEEK

Spain beat France 2-0 (14-JUL, Dallas) and Argentina beat England 2-1 (15-JUL, Atlanta) -- the final is set for Sunday, 19-JUL: Spain vs. Argentina at MetLife Stadium, NJ. There were fan-zone security incidents at San Pedro Square earlier in the tournament (a homicide and separate stabbings), though still no incidents at any stadium venue. Confirm match times before heading out. Stay hydrated and know where shade and medical stations are, regardless of the weather.

WHAT TODAY'S IRAN NEWS MEANS FOR YOU

The US military restarted its blockade of Iranian shipping today. President Trump says the US will keep the Strait of Hormuz open; the proposed cargo fee was dropped in favor of a Gulf trade-and-investment-deal plan instead. A tanker strike yesterday killed one crew member -- the first confirmed death in this round of the conflict. For most US households, there is nothing to do differently today -- but here is what to expect:

Gas prices: the national average moved to \$3.89/gallon this morning, a modest increase. Oil prices pulled back slightly overnight after the prior day's jump, though they remain near a 3-week high -- another pump-price move is possible if things don't calm down -- consider filling up soon rather than waiting.

Shipping/delivery delays: shipping through the Strait of Hormuz remains well below normal levels. If you rely on imported goods for a business, or are expecting an overseas shipment, build in extra time.

No safety action needed in the US: there is no credible threat to US soil tied to this at this time. This is a wallet/planning item, not a safety item, for the vast majority of households.

PREPAREDNESS CHECKLIST -- TODAY'S PRIORITIES

WILDFIRE (if you're in fire country)

- ☐ Check local fire status -- has containment improved or has the fire grown overnight?
- ☐ If Level 3 Go order is in your area: leave now, not later
- ☐ Go bag status: medications, documents, charger, water in the vehicle
- ☐ Livestock and pets: have a transport plan before the order arrives
- ☐ Monitor: NIFC.gov, local county emergency management, NWS fire weather alerts
- ☐ Sign up for county emergency alerts at your county EM website if not already done.

HEAT SAFETY (general reminders -- the recent multi-day heat wave has ended)

- ☐ Identify an air-conditioned space near you today (library, mall, cooling center) before you need it
- ☐ Check on elderly neighbors, young children, and anyone without reliable AC
- ☐ Never leave kids or pets in a parked car, even briefly -- vehicle interiors can exceed 120F in minutes
- ☐ Reschedule strenuous outdoor activity to early morning or evening; watch for signs of heat exhaustion

GENERAL FRIDAY MORNING PREPAREDNESS

- ☐ Check NWR (weather radio) -- 20 transmitters still OOS/DEGRADED nationwide, down from 21 (list has changed significantly since last report) -- know your backup alert method
- ☐ SimpleHelp/SharePoint/iCagenda/Balboa Forms users: federal security deadlines have all now passed -- patch now if you or your employer run any of these
- ☐ If you have family or colleagues in Venezuela: internet and phone service remain disrupted -- use satellite apps or the Red Cross Disaster Welfare Inquiry service ([redcross.org](https://www.redcross.org)) if you haven't already
- ☐ Family communications plan: do you have a meeting place and out-of-area contact if phones are down?

CONDITION SUMMARY

PREP-CON 3 BROWN SKY	Incident Probable -- multiple simultaneous active situations (US-Iran shipping blockade and first confirmed strike injury, national wildfire posture, Venezuela EQ recovery, Ebola PHEIC). None of these require action from most US households today, but today is not a normal day. Review your emergency contacts, know your local alerts, and make sure your go bag is accessible.
WX-CON 3 GUARDED -- Severe Weather	WX-CON 3 GUARDED, stepped down from 4. Today's risk is Marginal (a step down from yesterday's verified Enhanced) -- still worth watching in the Mid-Atlantic, northern New England, and parts of Montana/Wyoming/Arizona, but a lower-end threat than yesterday, including possibly a strong tornado. A smaller Slight risk is out for Montana. Wildfire conditions are tracked separately -- see today's lead story for Babylon/Cottonwood status.
SWX-CON 2 WATCH -- Routine Geomagnetic Alert	Today's space-weather feed shows a routine, low-level geomagnetic alert -- confirmed stable across the full overnight period, not just a data gap. Practical household impact remains low for essentially everyone outside the far northern US.
COMCON 4 Increased Vigilance	23 NWR weather radio transmitters are OOS or degraded nationwide -- the specific list has changed since yesterday, so don't assume your area's status is the same. Still have a backup alert method (phone alerts, local TV, or a battery-powered radio). If you manage enterprise networking equipment, several vulnerabilities remain unpatched -- see the cyber item above.
