LOG-10 Logistics Capstone

The Integrated Logistics Plan

One plan from every LOG course, tested under pressure and kept current after its builders move on.

BOTTOM LINE UP FRONT

LOG-10 assembles the worksheets from LOG-01 through LOG-07 into one Group Logistics Plan, finds where those courses contradict each other and what is only one deep, and tests the result in a multi-day exercise. It re-teaches no prior course; every lesson assumes the earlier worksheets exist.

Seven sound plans are not one plan.

Each course answered its own question correctly. But food was sized without checking cache space, the generator and vehicles may burn the same fuel, and every course assumed the budget was its own. Those collisions stay hidden until an activation runs every plan at once. LOG-10 finds them first.

> *"A plan that has never been run against the other plans is a draft, not a plan."*

THE SIX CAPSTONE OUTPUTS

GLP table of contents	Every series worksheet, filed under the ICS Logistics Section and classed current, stale or gap.
Integration matrix	Every conflict between course plans, how it was resolved, and why.
Single-point register	Everything only one deep, with a mitigation or a written fallback.
Exercise plan	Objectives, a tiered scenario, and injects that hit every course and accepted risk.
AAR and corrective actions	Findings traced to root cause and turned into owned, dated, verified changes.
Calendar and turnover packet	Every cycle on one calendar, version control, and a packet a successor can run from.

COURSE LESSONS

1	**Assembling the Plan**	Collect every worksheet and file it under one structure.
2	**Cross-Course Conflict Resolution**	Find where sections compete for fuel, space, money or people.
3	**Single Points of Failure**	Find what is only one deep, and fix or accept it in writing.
4	**Designing the Capstone Exercise**	Objectives, scenario and injects built from the matrix and register.
5	**Running and Evaluating the Exercise**	Evaluate against the plan as written; turn findings into changes.
6	**The Living Plan**	Maintenance calendar, version control and turnover.

DOCTRINAL SOURCES

MAG Workbook	Fortune Favors the Prepared	Roster and scenario tiers
LOG-01 through LOG-07	Fortune Favors the Prepared	Source worksheets for every section
LOG-05, Lessons 4 and 5	Fortune Favors the Prepared	AAR loop and drill design method
E-971 Facilities Unit Leader, Unit 2	FEMA / Emergency Mgmt. Institute	ICS Logistics Section structure
