Field reports, line by line

The free Message Formatter & Traffic Log now builds SALUTE, SITREP, MEDEVAC and eight more field reports, exactly the way the FFTP courses teach them.

COMMUNITY SITREP

A fused report on conditions after an incident: header, incident status, then all eight Community Lifelines with status, trend and ETA to green. Report what was observed, not what could happen.

	REMARKS				

A Community SITREP: header, incident status and all eight Lifelines with status, trend and ETA to green.

SALUTE REPORT

The full threat report: what is out there. Use it when there was time to observe all six fields.

	REPORTING STATION / OP	OP Alpha
S	SIZE	7 dismounted personnel, 1 dark pickup truck
A	ACTIVITY	Set up two observation positions at the road junction, facing north and east
L	LOCATION	County Road 12 and Mill Road, about 600 m southwest of OP Alpha
U	UNIT / UNIFORM	Civilian clothing, dark colors, no insignia
T	TIME	1435L–1447L
E	EQUIPMENT	About 5 long guns, 2 handguns visible

A SALUTE report, ready to read over the air or print.

MEDEVAC REQUEST

The numbered 9-line request (lines 1–2 date-time and unit, then the nine lines) for a MAG net where both ends know it. To 911, say the same things in plain language.

1	DATE-TIME GROUP	091430ZSEP26
2	UNIT	Demo County MAG, Team 2
3	LOCATION	16S EF 12345 67890

1 **Pick a report** and fill in its lines. Hints on every line, a Now button for every date-time group.

2 **Read it, print it or send it** inside a Radiogram, ICS-213 or MARS message, with the starting precedence suggested.

3 **Log it** with the rest of your traffic, and print the log as an ICS-309 or ICS-214.
